

AMENDMENTS

In the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claims 1-2 (canceled).

Claim 3 (previously presented) A differential according to claim 5, wherein the support member and the clutch are axially arranged to each other.

Claim 4 (previously presented) A differential according to claim 5, wherein the drive gear is located in radial alignment with the support member.

Claim 5 (previously presented) A differential comprising:

a drive gear;

a differential housing rotatable relative to the drive gear and operative to be driven by the drive gear;

a differential mechanism housed in the differential housing and being rotatable by the differential housing;

a support member located between the drive gear and the differential housing for supporting the drive gear to the differential housing for relative rotation; and

a clutch operative to interconnect the drive gear and the differential housing with each other, the clutch including:

a first clutch engageable between the drive gear and the differential housing, and

an actuator for operating the first clutch,

wherein the first clutch is located axially between the support member and the actuator.
